

- Use [My State Info](#) to find the information you need to know in your state about Walking and biking Safety under our new Pedestrian and Bike Safety Section.
- [PedBikeInfo](#) center is supported by Federal Highway Administration and National Highway Traffic Safety Administration (NHTSA) providing information and resources around Pedestrians and Bicycle safety.
- [NHTSA's Walkability Checklist](#) is a checklist to rate your neighborhood's walkability.
- [Traffic Safety Fact Sheets](#) are annual released documents by NHTSA that highlight the latest developments and trend data. The most recent year of finalized data is for 2019. 2019 Data: Bicyclists and Other Cyclists [2019 Data: Pedestrians \(dot.gov\)](#)
- [Pedestrian Safety Training](#) is an interactive, computer-based program to help law enforcement officers understand the factors associated with pedestrian crashes, develop meaningful countermeasures, and enforcement strategies.
- [Transportation Safety Institute Courses](#): Offers free courses on a range of topics. (Note: While the courses are free, you will need to [register](#) to sign up and then select the training from the NHTSA training topics.) The following courses are particularly relevant for older driver safety.
 - [Pedestrian Safety for Law Enforcement](#): This engaging and interactive course was designed with the direct involvement of law enforcement officers to broaden your knowledge of pedestrian safety and to help reduce crashes that involve pedestrians in your community. By the end of the training, you will have a better understanding of the components of pedestrian-involved crashes, crash scene investigation and reporting, and ways to partner with your community to promote pedestrian safety. This course contains five modules that you can complete at your own pace.

- [Bicycle Safety for Law Enforcement](#): This engaging and interactive course was designed with the direct involvement of law enforcement officers to broaden your knowledge of bicycle safety and to help reduce crashes in your community. By the end of the training, you will have a better understanding of the components of bicycle-involved crashes, crash scene investigation and reporting, and ways to partner with your community to promote bicycle safety. This course contains five modules that you can complete at your own pace.
- [Motorcycle Safety for Law Enforcement](#): This course is specifically geared for law enforcement officers and contains eight, online modules that you can complete at your own pace. There are also short pre- and post-assessment surveys to help you gauge how your knowledge increased during the course. This is an online course.
- [Stepping Out as an Older Adult](#) helps you step out to exercise, run errands, or both, make sure you can maintain your safety while enjoying the health benefits of walking.
- [NHTSA Pedestrian Safety Page](#) raises awareness of the dangers to pedestrians and provides tips to keep pedestrians safe.
- [NHTSA Bicycle Safety Page](#) raises awareness of the dangers to being a bicyclist and provides tips to keep bicyclist safe.
- [Data Visualization Tool](#) from the National Center of Statistical Analysis presents data on vulnerable road users involved in fatal motor vehicle traffic crashes. This visualization is modeled after the information presented in the Traffic Safety facts sheet.
- [The Safer Streets Priority Finder](#): This site enables you to analyze the risk to vulnerable road users (bicyclists and pedestrians) on your community's roads.
- [National Pedestrian Safety Month Resource Guide](#): NHTSA developed a resource guide to help stakeholders address pedestrian safety. This tool will offer ways to get involved through traditional media and online media.
- [BikeCheckList](#): is a checklist to rate your neighborhood's bikeability.
