

Clearinghouse for Older Road User Safety

[Participate in National Older Driver Safety Awareness Week

December 5-9, 2022, is Older Driver Safety Awareness Week which aims to promote older drivers' safety. In 2020, there were more than 55.7 million people 65 years and older in the United States, according to the U.S. Census Bureau.¹ Older drivers (65+) tend to be safe drivers but they are also a highly at-risk population. People 65 and older made up 17% of all traffic fatalities in 2020² and 66%, or 2 out of 3, fatal older driver crashes involved other vehicles – so helping older drivers be safer on the road can also help those around the older driver be safer.³ Older road users are not just behind the wheel. Older road users share our roadways while they are walking, biking, riding motorcycles or even passengers in public transit or shared transportation (for example, taxi or uber).

Older Driver Safety Awareness Week is the perfect opportunity to promote older driver safety and older adults' mobility and transportation needs. The Clearinghouse for Older Road User Safety (ChORUS) provides professionals and individuals resources to encourage and support older driver traffic safety.

State Driver Licensing Agencies can determine fitness to drive and provide information to help older drivers stay safe while on the road. For ways counter staff can help ensure older drivers' safety, visit the [ChORUS State Driver Licensing Agency Resources](#).

Throughout the week, ChORUS will promote a different aspect of older driver safety such as knowing the signs for when driving behaviors should change, how to have the conversation with an older driver, and transportation planning tools and resources available to help. We encourage [you, your peers, your members, your users, etc.] to learn more by following ChORUS on [Facebook](#), [Twitter](#), or [LinkedIn](#).
